

## HEALTH SERVICES

TEBA understands that employers, workers and communities cannot realise their full potential if burdened by ill health. We work closely with health industry partners and donor organisations to provide occupational health interventions and palliative care programmes to workers, their families and communities.

HEALTH  
SERVICES

## HEALTHCARE SERVICES

TEBA engages with employers, donor organisations and broader stakeholders to provide occupational health services that reach employees and broader communities.

We have the capability and the experience to deliver awareness campaigns, community mobilisation programmes, palliative care programmes and crucial support for workers with health conditions and/ or injuries both during and after employment.

We also work closely with SADC and other regional partners to support initiatives directed towards reducing occupational lung diseases, with a specific focus on TB management.

## HOME-BASED CARE SERVICES

- Palliative care provided through home visits to medically repatriated patients due to ill health or injury
- Healthcare staff monitor adherence to prescribed medicinal courses
- Formal referral processes & links to local health facilities
- Transportation to relevant government health institutions
- Cross border referral to appropriate government health institutions for biomedical care
- Progress reports are delivered to clients on a regular basis

## HOME ADAPTIONS

- Installation of paraplegic toilet facilities (in rural areas)
- Installation of a bathroom with equipment (bathtub with handrails and seat, paraplegic hand wash basin and flush toilet) to existing housing structure
- Note: The bathroom installation is dependent on the availability of running water in the area.
- Building of wheelchair-appropriate ramps and walkways
- Widening of internal and external entrances/ doors
- Installation of 5000L water tanks and guttering
- Installation of 150L solar geysers
- Any other adaptations that the client may request TEBA to manage on their behalf

## TB AND HIV

- TB and HIV Screening and testing
- Document collation for referral
- Treatment adherence counselling and support
- Tracing and referral for benefit medical examination
- Tracing of defaulters and referral for continuity of care
- Nutrition & disease prevention education
